It should be remembered that the price of the Shares and the income (if any) from them may go down as well as up and that, on the redemption of their Shares, investors may not receive the amount that they originally invested. The investment returns on a Fund’s portfolio and the returns from an investment in Shares, Bonds or other assets in the future may differ materially from historical returns and will depend, among other things, on the composition of that Fund’s portfolio. Past performance is not a reliable indicator of future performance.
